

INTRODUCING THE INDUSTRY DISRUPTING MOBILE COMMAND CENTER

MCC BRUTE ADVANCED

Purpose-built to change the industry relative to size, performance, and cost for rapidly deployable, ruggedized, and portable LTE connectivity.

CUSTOM ENGINEERED INTERNAL STRUCTURE

Designed to protect the technology components from weather, impacts, and vibration

CRADLEPOINT E3000

Support your team in the field with the maximum LTE modem speeds available, with load balancing across two modems to assure the best user experience possible in the field. Remote web-based access to all key configuration settings, VPN functionality, enterprise grade security, up to 128 client wifi connections, all with the future proofing made possible with its 5G ready design.

SECURITY

Ability to lock the case to eliminate tampering.

ANTENNA

Custom-designed and laboratory tested high-gain antenna system built directly into the lid, eliminating a major pain point in traditional paddle and stick antenna solutions that reside outside of deployable kits.

CATALYST POWER

Powered by a 64,000 mAh battery, ample power is available for extended deployments.

MIL-SPEC 1P67 RUGGED CASE

Solution is encased in a weatherproof, rustproof, and drop-tested lightweight carrying case. Fully-functional even when case is closed and locked.

ADVANCED ACTIVE COOLING

Keep your team performing optimally in all weather conditions with an active cross flow cooling design

PORT ACCESS

Weatherproof exterior port access to AC Power, 4 POE Ethernet Ports, and 2 standard Ethernet Ports
