ONLINE PORTAL

Using the CSG View online management portal provides an easy solution for remotely administering your routers from a single, convenient location
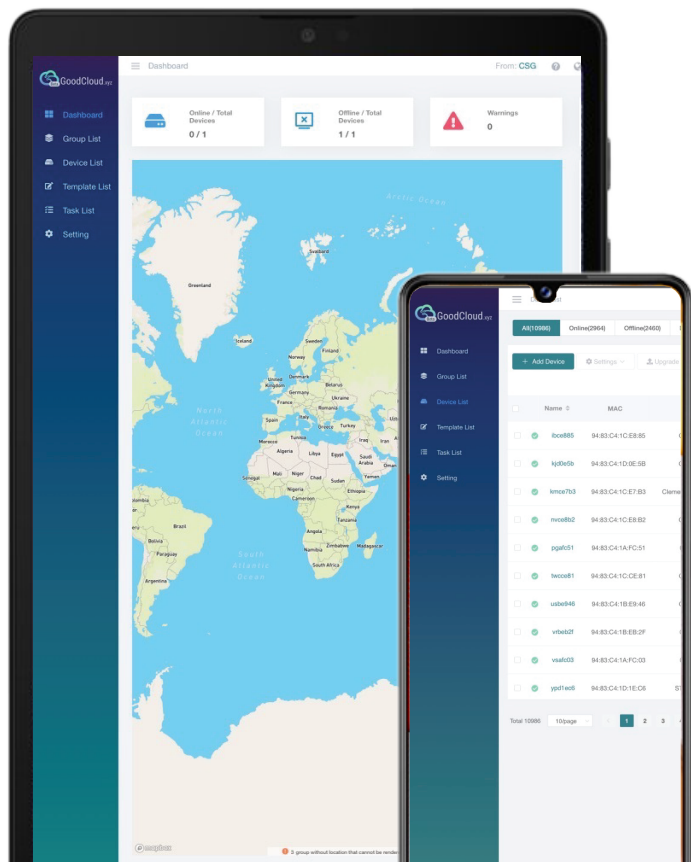

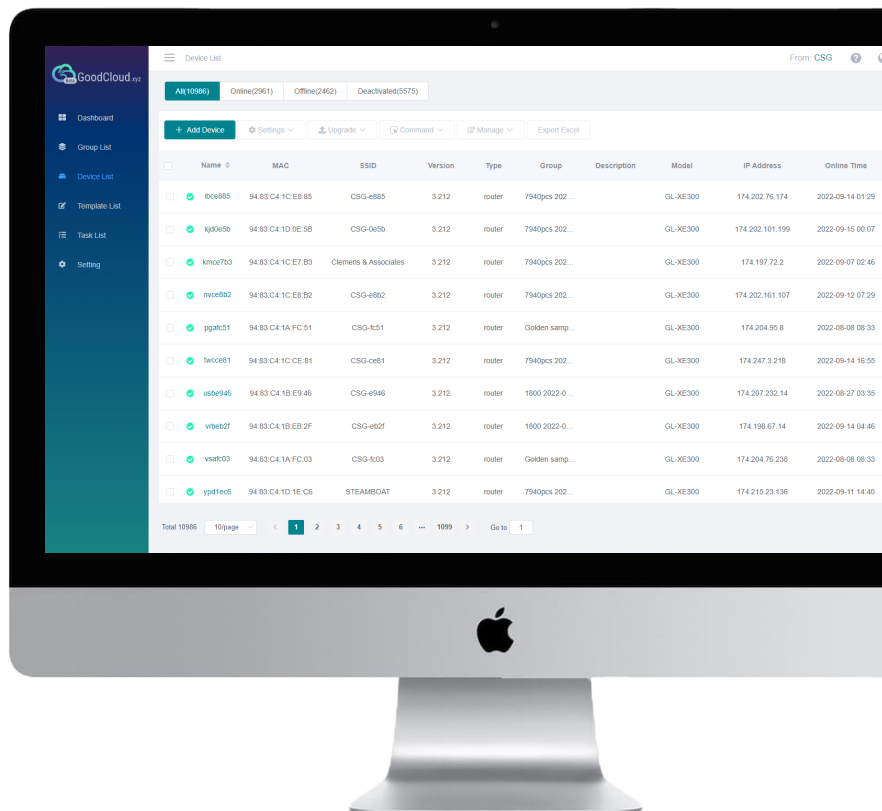

CHECK LIVE ROUTER STATUS

· Live online/offline status check
· Live RAM and Load Average check
· LTE Signal
· Email alert for online/offline status update

SET UP ROUTERS REMOTELY

· Set up routers (e.g. SSID and Key) remotely
· Remote SSH
· Remote access web Admin Panel

SITE TO SITE

· Virtual Office: extend your office network to other offices
· Business Travel: remote access to office's internal systems (QA, CRM, MySQL)
· Smart Home: remote access IP camera, NAS and other devices at home

MANAGE ROUTERS IN GROUPS

· Divide devices in different groups for easier management
· Manage devices at a glance on one page

MONITORING CLIENTS ON ROUTERS REMOTELY

· Check who is on your network
· Real time traffic monitoring and block clients
· Email alarm about new client and block

OPERATE ROUTERS IN BATCH

· Set up configuration templates and configure routers in batch
· Reboot or upgrade routers in batch
