04 INSTALLATION

Pole Mounting Installation

Step 1:
Thread the metal clamp through the assembly holes of the pole and base, and pre-tighten the screws.

Step 2:
Move the base to the desired position on the pole, lock the screws with a screwdriver, and secure the clamp.

Step 3:
Insert the plastic nut into the base ball head.

Step 4:
Press the antenna body into the ball head base, adjust the antenna to the desired angle, tighten the nut, and place the cable into the corresponding cable slot.

Step 5:
Installation completed.

Wall Mounting Installation

**Step 1:**

Mark the appropriate positions on the wall with the four mounting holes on the base, and drill four holes with a diameter of 6mm and a depth of 25mm.

**Step 2:**

Insert the expansion bolts into the four holes.

**Step 3:**

Lock the base into the expansion bolt with screw components.

**Step 4:**

Insert the plastic nut into the base ball head.

**Step 5:**

Press the antenna body into the ball head base, adjust the antenna to the desired angle, and then tighten the nut.

**Step 6:**

Installation completed.

Suction Cup Mounting Installation

Step 1:

Install the suction cup into the corresponding mounting holes around the base.

Attention: Check if the suction cup is deformed. If there is obvious deformation, soak the suction cup in warm water at around 60 degrees Celsius to eliminate the deformation and restore it to its normal state.

Step 2:

Align the base with the safety installation surface, press the suction cup firmly to eliminate internal air, and fix the base.

Attention: The installation surface should be a smooth surface, such as a smooth glass surface, smooth mirror surface, or smooth ceramic tile. Before installation, the installation surface needs to be cleaned to ensure that there is no dust or other contaminants.

Step 3:

Insert the plastic nut into the base ball head.

Step 4:

Press the antenna body into the ball head base, adjust the antenna to the desired angle, and then tighten the nut.

Step 5:

Installation completed.
